

# Walkthrough (version 1.0)

This walkthrough is for the True endings of the paths

If you are in a scene and the choices are not listed here, it doesn't matter for the outcome which you choose.

- The only thing could change is the content of the scenes, so if you want to see all you have to play with the choices around.

Some paths are done before the 10 days are over, so you can jump with the „skip“ button direct to the endings. Also when you want to see all endings and play just one character's path.

When you reach some endings, you'll get a menu where you have to choose you're ending. This will happen when you reach the True ending for all character's, but didn't play the harem scene. (Also needed to reach all endings.)
