The First Night

The opening sequence is a little bit different than the rest of the game. It's more in a visual novel style with text menus giving you options of what to do.

This one section will be a straight up walkthrough because it's set up as an intro into the world.

You awaken in your bed. You can watch your wife sleep or try to force yourself to sleep but neither of those actions do anything.

To progress the plot you must “Leave the Bedroom”

This sends you to the upstairs hallway. To progress you must select “Peek into your [fully adult human female that lives in your house]'s room”, then “Watch her for a moment longer”.

After this you can explore the house. In the upstairs there's also a bathroom, but nothing useful to do in it. Downstairs and in your home office there are a couple more options but they don't provide anything useful.

The optimal choice is to go to the home office, “Do some work”, which will earn you between $25 and $75 dollars, then “Check out some porn”. The porn primes you for the next plot segment.

Go back upstairs and your [fully adult human female that lives in your house]'s bedroom and “Take a closer look”.

Once she finishes she will catch you watching her. After reassuring her that it was an accident and what she was doing was normal you'll have a few options. “Pat her on the head” will increase her Affinity by 3. “Kiss her on the forehead” will increase her Affinity by 5. “Kiss her on the lips” will decrease her Affinity by 15. “Do nothing” will set her Affinity to 1.

From here you have several options of what to do.

The obvious option is to go to the bathroom and jerk off. A devil version of your [fully adult human female that lives in your house] will appear and tease you. Afterward you'll receive -1 morality.

You can also go to the bathroom and take a cold shower. An angel version of your [fully adult human female that lives in your house] will appear and you will torment yourself about your lustful thoughts. This will give you +1 morality.

You can also go downstairs and go for a jog around the neighborhood. This has a similar effect to taking a cold shower.

Ultimately there's going to be a Paragon/Renegade situation set up in the game. Basically there will be a secret path implemented where you don't bang your [fully adult human female who lives in your house for some reason] (WHY ARE YOU PLAYING A TABOO VISUAL NOVEL!????).

Anyway, after you make your decision you'll wake up the next day in the main game loop.
Overall Gameplay and Strategy

There are a number of locations and characters in the game world you can interact with. The characters go through schedules and you can find them at different locations at different times. The game cycles through a time system. Every action that you perform that gives you either information or affects your relationships will advance time to the next period. You wake up in the Morning, that follows through to Noon, then Afternoon, Night and sometimes Late Night. To unlock Late Night you need to drink coffee in your house in the afternoon (or drink coffee at the coffee shop any time). If you stay up into Late Night you'll sleep through the Morning the next day.

Gradually over time your lust will increase. If it's too high you will lose access to “safe” choices that won't negatively influence your relationships with various characters. You can reset your lust by either jerking off/playing an adult scene with a happy ending.

The computer in your home office allows you to work, which gives you between $25 and $75, access social media, which will give you hints on what different characters like, or access to the darknet, where you can purchase bitcoins and use those bitcoins to purchase illicit tools and substances.

The gameplay is mostly predicated on the house, which has various bedrooms, a bathroom, the kitchen/living room and your home office. You can also click on your truck to visit other locations in the town.
Attributes

Lust
A measure of your sexual self-control. Slowly goes up over time, or is increased by doing lewd things that don't give you a “happy ending”. If it's very high (10+) it will restrict the safe options in events. Can be reset by masturbating or lowered by taking a cold shower.

Morality
How good you feel about your actions. To start with it doesn't have a huge effect. In the late game it will have a significant effect on the high level interactions. Once I have enough content to start writing endings it will be one of the major signifier of what version of a given ending you get. Can be improved by praying or confessing in church.

Coding
How good you are at writing code. Increasing it increases how much money you get from “working”. Is increased through work itself, or by doing work at your home office, researching coding from your home office or doing research at the library.

Law
Your understanding of law. Will effect what options you have when you confront your wife about her infidelity. Can be increased by research at the library.

Charisma
Increases the bonuses you get to other characters main attributes. Can be increased by research at the library or by auditing the communications class at the college.

Strength
How good you are at beating people up. Can be increased by pumping iron in your home office or by taking classes at the gym.

Stealth
How good you are at peeping. Can be unlocked from buying “Succubus Prison” at the game store and playing it on your home computer. Once unlocked it can be increased by peeping or by reading a boot in the library.

Characters

Emily
She is a good girl. She always got good grades in school. In the fall she's going to be attending college. In the meanwhile she's working at a coffee shop with her best friend Brenda.

She is very anxious about romantic and sexual matters. She is very sweet and demure.

In the morning she is either in her bedroom, the bathroom or working out in your home office. At noon she'll be at the coffee shop during the week and in her bedroom on Saturday and Sunday. In the afternoon she'll be in her bedroom. She will be in her bedroom at night.

Her favorite gifts are flowers and chocolates and she doesn't like wine or nootropics.

Alexandra
Your wife (well… probably). She has grown cold as of late and your relationship is suffering. Lately she has been working late far more often than she has in the past and you are growing suspicious.

Building affinity without gifts will be a very slow and grindy process.

She is at her office in the morning and noon. There's a 50/50 chance she'll be in the hotel in the afternoon, if you haven't already progressed your relationship with her (ie either given her an open relationship or chose to dominate her or kicked her out). She will be at home in the evening.

Her favorite gift is chocolates and she really doesn't like nootropics or Law Fuel.
Mary
Your wife's secretary. She's a bit of a trollop and likes to be manhandled, not that there's anything wrong with that.

She's at your wife's office in the morning, noon and afternoon. At night she's at the dive bar during the week and at the club Saturday and Sunday.

Brenda
Emily's best friend. She works at the coffee house with her. She plays herself off as very experienced in sexual and romantic matters. She likes it when you are aggressive.

She is at the coffee shop in the morning and afternoon. She is at the Graveyard in late night. On weekends she hangs out with Emily in the afternoon.

Her favorite gifts are wine and nootropics and she hates flowers.

Sam
A very bad girl. She has been sent to you so that you can be a good influence on her. You can either discipline her or feed her naughtiness. She arrives after Day 10 with a scene that takes up a good chunk of the day.

She is in the Guest Bedroom once she is unlocked. Once you raise her discipline or naughtiness past 5 you'll get the option for her to either get a part time job or have her help around the house. If you've taken the discipline route and had her take a part time job she'll be at the ice cream shop in the morning and if you've taken the naughty route she'll be in your home office. If you've opted to have her help around the house she'll be in your home office at noon.

Laurel
She works at the ice cream shop you sometimes take Emily to. She's a college student but also hard up for money and kinda desperate. Also, she's the daughter of Dan, the guy who's spending too much time with your wife. To actually start a relationship with her you need to be aware of Dan's existence, either through grinding affection with your wife or befriending Mary enough that she'll divulge what she knows your wife is doing.

To start with she's at the Ice Cream Shop at Noon and Afternoon. At Night you can watch her Cam Show (once it's unlocked) from your Home Office.

Once you're friends with her she will appear at the library in the Morning. At noon she'll be at her apartment. In the afternoon she will either be at college, the ice cream shop or her apartment. At night she'll either be at college or her apartment.

Miranda
The wife of Dan and mother of Laurel. She doesn't want to believe her husband is spending too much
quality time with your wife until you furnish her with proof. After that she'll fuck you to spite her husband.

In the morning she'll either be at the gym or her apartment. In the noon and afternoon she'll be at work, except during the weekend, where she'll be at the beach at noon. At night she'll be at her apartment.

**Vanessa**

A low key addition to the cast. She works at the video game store at the mall. Once you have befriended her it's possible to get her to take off her top.
