NOTES

- This Walkthrough is for the collection of all CGs.
- It is difficult to collect all the CGs.
- What is shown on the map is not always related to a particular character's icon.
- Certain events need to happen in order for the following chain of events to occur.
- Therefore, it is necessary to choose a "location" of the "sweet home" and secure an event, rather than the solely choosing the "heroine" icon you want.
- The charts in this walkthrough does not cover all events on all locations.
- The charts are designed to help fill up the CG collection, while completing each heroine's storyline.
- Please note when looking at the chart, the emphasis is on the "location".
- Also note, the characters' icons may not necessarily appear on some locations.
- While there is a "cum inside" or "cum outside" selection in the game during H scenes, only one CG scene is the mechanism for triggering the event for the remaining CGs of a heroine's storyline.
- Therefore, for most H scenes in the game, basically you can choose either "inside" or "outside."
- However, please note when selecting "inside / outside" immediately after a particular "save point," the story branches off to its particular ending.
- The chart has several "save points" denoting the turning points of the stories.
- For convenience sake, after the save point, I have the same kind of selection (inside or outside) throughout to the end; however, once an event is triggered after the save point, feel free to select either one.
