Abilities

At the beginning you'll have the option of putting points into various abilities. Throughout the game different events are gated off based on your ability scores and you gain two points every level to add as you wish. Certain events in the game world can give you a bonus to your Abilities, or usable items can be used for the same purpose (though these bonuses will decay over time). Each of the female characters in the game likes one skill and your score will effect all interactions with her.

Charisma
Your ability to deal with people. Can be buffed with Cologne.

Money
The maximum amount of money you'll have per day. Can be buffed with Gift Cards.

Fitness
Your ability to perform physical actions. Can be buffed with Protein Powder.

Stealth
Your ability to sneak around unseen. Mostly useful to unlock peeping scenes. Can be buffed with Silent Insoles.

Intelligence
Your understanding of events. Can be buffed with Nootropics.
Gameplay

Through the game you explore a world. Different characters are at different locations at different times. If you are trusted by a character you have access to a hub scene where you can give them gifts or use your Confidence on them.

As you wander around the world and interact with events you accrue experience. Every two levels you pick up another point of Confidence, for use during adult scenes. Your Confidence refills every day.

Your money is determined by the Money stat+1 and refills every day. By winning in different forms of gambling you can exceed this maximum.

When using Confidence, whether or not it's successful will depend on what you're trying to do, your level, the favorite Ability of the character you're trying to manipulate, and the Resistance your target has worked up from your previous attempts. Even a successful attempt to use Confidence will increase your targets Resistance. Failures will increase resistance more. Resistance will slowly decay over time, or you can give your target gifts to decrease it faster.
Introduction

In the opening scene you are attending your High School Reunion at the local night club. The first option you are given is to spy on Chad and Stacy or talk to Tyrone. If you have a point of Stealth you will gain experience for this. Tyrone will give you some information about Stacy.

Afterward Genie, an old friend of yours introduces herself. You barely recognize her because she says she's been taking better care of herself. If you say “That's good because you needed a lot of work” she'll be insulted, unless your Fitness stat is more than 0 (in that case you'll get experience). If you tell her “Wow, all that work was a really worth it” you'll get experience if you have more than 0 Charisma.

After this Chad will come and apologize for being a dick in school. You can accept his apology or not, neither way will matter.

Once this is done you can choose to talk to Stacy or Genie. As the scene plays out your Confidence will be unlocked and you will convince either Stacy or Genie into engaging in sexual acts with you.

As you hobble your way home Chad and Tyrone will stop you and explain that they know about your power. They offer advice and you make your way home.
