

Walkthrough/Info NYD1.32

This walkthrough assumes you have done all the Mia related quests available prior to version 1.32. If not, please see Ghostwalkers walkthrough available for download on my patron page.

Get Past Granny!

The new events start just after you've gotten Mia grounded. If you try to open Mia's door or talk to grandma, she'll basically tell you she won't allow you to see Mia again. When you walk away, the MC will start wondering if there is a way to sneak past granny. Balder (the direwolf pup you gave Mia) exits the house and walks past Granny. Hmm...he must be able to enter the house freely.

Talk to Balder. If the player has had any experience with the "Summon" spell before, he'll figure that might be a means to disguise himself as Balder. But he'll need to keep Balder out of sight for a while to avoid suspicion. A steak should keep Balder occupied.

If the player hasn't learned the "Summon" spell yet, he won't know what to do. In that case you should do Ziva's Quest to recover the temple of Qetesh and ask Beth (girl in the stables) out for a date first. See Ghostwalker's walkthrough for information on how to do this.

Now that you've assumed Balder's appearance Mia will take you for a walk in the woods. She'll start to play with herself and you'll have the option to engage or watch. There is a short scene for each option. Watching won't get you anywhere and you'll need to redo this scene again the next day to try again.

If you choose to engage, you'll eventually get to speak with Mia. She'll agree to meet you each time, if you place a piece of wood on the rock next to the path. So you can have some quality time together. You can only do this once a day. Also, she won't let you cum in her...damn it!

Head over to the tailorshop, there you'll find a Red Riding Hood costume. Purchase it. And ask Mia to wear it next time you meet her. This will unlock two new sex scenes and Mia will eventually allow you to cum inside her. Yay!

Once Mia is pregnant, you'll be confronted on the path by Mia and Grandma. You'll have to promise to take care of Mia and her child. Or deny any involvement. The latter will cut you off from any further involvement with Mia for the rest of the game, so choose carefully!

Taking care of your new family (Build Your Own Home)

First, you'll need to expand grandma's house, so you can move in with Mia. Chop down the two trees to the left of the house. You'll need to equip an axe for that. Then construct the house by activating the pile of building materials. Now you have a new home!

While pregnant Mia will only allow you to have sex with her during the night (haven't made any other scenes yet). Also, her willingness to have sex depends on her affection towards you. The lower it gets, the less likely she is to agree to sex.

Eventually Mia will give birth and you'll get to name the child. Once she's given birth you can have sex with her in the woods and get her pregnant again. This cycle can continue until you have had your sixth child. After that she can no longer get pregnant.

Lying to Mia

During several of the sex scenes Mia will ask you a question and you'll have the option of lying to her or expressing genuine affection. Lying to her will make her skeptical and in some instances lower her affection. Honest affection increases her affection towards you. This in turn changes some of the dialogue and pictures in each scene.

Gestation periods

Once you knock Mia up, it'll take her five days to notice. Once she notices, she'll inform you. After 20 days she'll give birth to a baby. She impregnates again as soon as she has given birth.

Affection

Mia's willingness to have sex, and the responses of your family members (children, grandma, Mia) depend on her affection level. Lying to her will lower her affection, so will staying away from home for extended periods of time. If you stay away from home for more than 4 days, her affection will start to drop. Note: you'll need to spend the night for it to count as a day spent at home.

Cooking food and having sex (cumming inside her against her will, can in some cases lower affection) will raise her affection.

Children

You can have a total of six children with Mia. No potions can increase that number. Tinkerer wills it so!

Use the Esc key to remove letters whilst naming your kid. When the child is 15 days old it will receive its own sprite and walk around in the garden and sleep in its bed at night.

Bandits!

This isn't Mia related, but is non the less a new feature in this version. If you head over to the village and speak to the guard outside the guard tower, he'll tell you they offer a bounty of 50 coins for each bandit you bring in. Now there is a catch: they want them alive. You have two ways of capturing a bandit alive:

1. Use the "Stun" spell to knock them out (Find the dark elf mage in the east, Erevi, to learn that spell.

See Ghostwalker's walkthrough for further info.)

2. You can buy a rope at the general store. Once you defeat the bandit in combat, you can tie him up and deliver him to justice.

Do note: you can only carry one bandit at a time. Follow the road to the west of the village to encounter bandits.
